BIDDING SOFT CLOSES AT 7 PM

Racehorse Style Close with Extended Bidding

www.olefarms.com

Kelly & Anna and Graham & Leslie Olson

BREEDING PHILOSOPHY

~ The two most important factors in Western Canadian beef production are weaning percentage related to cows exposed to bulls and winter feeding costs ~

~ Select for high fertility calving ease with good maternal merit and the ability to graze through the winter to be bred back ~

~ We don't trim the sale bulls' hair before our sale. We think it is important that you see them in their natural state ~

~ Our bulls' feet have not been trimmed ~

~ Our industry is far too focused on production; we should be focused on profit ~

***Our bulls are not
Pushed ~ Pampered ~ or Picked over***

Kelly & Anna

*Leslie, Graham,
Carl & Ace*

Each year we seem to be tested in a different way. 2021 brought severe drought and very high feed prices to most of Western Canada. At Ole Farms we got 60% of the normal rainfall in the May to August period and above average heat in early July. Consequently hay and silage fields were less than one half of normal. When I was chopping hay silage I soon realized that if you were approaching a high production area in the swath you better hold on because you were about to hit a rut from the wet years of 2019 and 2020!

The saving grace for us was our corn crop. Corn loves the heat and is a very efficient user of water. We had seeded 900 acres of corn for winter grazing and it was a difficult decision to chop it all for silage, since we were so short of feed. We had a good supply of canola straw that has good value nutritionally but is not palatable. By mixing corn silage with the canola straw we will get our livestock through to spring. We still feed them in the field so as to spread the nutrients of the manure on the land.

Building soil is a big priority at Ole Farms. A good pasture rotation system is critical to the goal of building soil. Although we are not there yet, our goal is to have a least 13 paddocks in every cell (or grazing herd). We currently are running 15 grazing cells. So if each group needs a minimum of 13 paddocks, that is 195 different paddocks. We are constantly building fences and improving watering pipelines, and are confident that we will one day achieve our goal.

We are continuing to build cattle genetics that perform well in our tough climate. Cold weather, deep snow, soft grass in wet environments and low quality grass on our peat land. Cows need to be deep and thick with plenty of back fat to survive. Good feet and udders are critical to us. If a cow cannot move easily or needs help to feed her newborn calf she must go. This type of cow - low input, no non-sense - will produce more profit per acre which should be the only measurement we need. We believe the cow herself is what makes or breaks an operation. Unless your cows are already perfect your best genetic focus should be on the cow herd. That's what pays the bills and we believe that large-framed high performance bulls only produce the wrong kind of cow.

Last year was our first ever timed auction. Most customers liked it and as for us, it went very well, so we have decided to repeat this method of selling bulls and bred heifers. We will have the animals on display on Friday through Monday, when the sale closes. Please feel free to come to Ole Farms to look over our cattle any time.

We agree that we have a talented, knowledgeable and dedicated crew working here at Ole Farms, and wish to thank the employees whole heartedly. Thanks also to all of our customers whose support makes our operation viable. I am pleased to report that when talking to many of you that you are all resourceful and have secured enough feed for the winter and are either holding your own or are expanding. I can only hope that Ole genetics are helping you to be profitable.

I am always optimistic about our industry. My sincere best wishes for a good year, a profitable year. Do not hesitate to visit our farm or call if you have any questions.

How to Participate in the DLMS Farm Gate Timed Auction with Extended Bidding:

1. Visit www.dlms.ca, scroll down sale list to find the sale you are interested in bidding on. Click on the sale listing and you will be taken to the Farm Gate Timed Auction Sale page.
2. After you are at the Farm Gate Timed auction site - farmgatetimedauctions.ca, click the LOGIN/REGISTRATION button.

First time Farm Gate users:

- First time users will select the REGISTER button from this page. Fill out the registration form to signup for a free user account and it allows you to select a username and password for use on all Farm Gate Timed auctions. (Please note due to some of the text notification features the Farm Gate Timed Auction Site requires a new account, separate from your DLMS Live sale site account)
- After you create your Farm Gate account you will receive a text message with a pin code to verify your account.
- On your first log in to Farm Gate Timed auctions we recommend you go to your profile and confirm your notifications are set to YES. This allows the site to send you text and/or email notifications when you are out bid and if there is activity on your favorite lots.

Returning Farm Gate users:

- If you have used Farm Gate Timed auctions in the past simply enter your user name and password to continue. After you have logged in you are able to browse the timed auctions on DLMS Farm Gate Timed Auctions.

3. How to Bid:

- Now that you are logged in and your account phone number / email is verified you are able to bid on an upcoming sale. Simply find the lot you are interested in bidding on. After you have found the lot there are 2 options for bidding on the lot.
- Place Next Bid - to place the next bid on the item, you see the amount in the first box, you simply click the "Place Bid" button and after you review the bid and agree to the terms and conditions your bid will be placed.
- Max Bid Amount - to place a max bid you put your max bid in the second box listed as "Max Bid" on the item, and then click the "Place Bid" button and after you review the bid and agree to the terms and conditions your bid will be placed as the next bid. With the Max Bid placed the computer will then keep you as the high bidder to the max amount you have placed. This can be a great feature if you are not able to give 100% attention to the sale close out and protect your interest so you do not miss out on any lots you want to purchase. The Max Bid amount is completely confidential from the seller during the sale process.

Example of How the Max Bid Works

- If the lot has a \$2000 bid on it and you place a proxy bid of \$3500 into the system, the computer will bid \$2100 for you but if some one else bids \$2200, the computer will again bid for you, this time at \$2300. The system will look after your interest to a maximum of \$3500. If another bidder is on at \$3600, your proxy will no longer be effective and you will no longer have the winning bid on this lot without once again logging in and bidding again or moving your attention to a second lot of interest. Please note that in some cases a lot value can change very quickly if 2 max bids are placed on the same lot competing against each other.

4. Watch List Feature

- If you have items in multiple auctions or only a few from the same auction that you want to watch without having to scroll through the entire list you can add the lots to your watchlist. On each lot you will see the "eye" button beside the bid button, by clicking this "watchlist" icon that item is added to your personal watchlist for easy viewing of just your favorite lots in this sale or on the entire site.

5. Sale Ending / Closeout

- Most Farm Gate Timed Auction sales close racehorse style with extended bidding. What is Racehorse Style Close? Racehorse style sale close is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the same sale if the bidding has gone in to extended bidding.
- How Will Extended Bidding Work? When we get to the close out end time the clock for close extends with any bid placed with less than 5 min on the clock. This type of extended bidding turns the end time to more of a soft time. Extended bidding allows bidders to compete in lots like a real auction and give all bidders the same time to make a decision. Always follow the clock to see how much time remains in the sale you are interested in.

6. Bidding Close & Follow-up

- After the clock has gone to "ENDED" and no bidding has occurred for 5 min the computer will declare the sale finished. Following the close typically within 24 hours of the sale close the sale consignor will contact all winning bidders to arrange payment, transfer of pedigrees and delivery/pick up of your lot. Or as the winning bidder you can contact the sale consignor/sale manager to confirm payment instructions.

Please make sure that your account info is up-to-date and correct if you are the winning bidder of a lot as this is how the billing is sent to Sale manager and/or Sale consignor.

**For more info and assistance with winning bidding contact:
DLMS Farm Gate Timed Auctions ~ Mark Shologan Ph: 780-699-5082**

Herd Health Program

- Zoetis Animal Health Program
- All cattle have been vaccinated, following Zoetis Animal health protocols
- P.I. (Persistently Infected BVD) - all sale bulls are guaranteed BVD/ P.I. infected free animals
- All bulls sell with a certified semen test prior to delivery

Calving Ease

Star ratings are the subjective estimate of these young bulls' calving ease

CALVING EASE ★★★★★

Likely to have a high level of calving ease based on dam and sire history, actual birth weight and EPD of birth weight

CALVING EASE ★★★

Should be comfortable for use on heifers of the same breed

CALVING EASE ★★

Bull should be used on cows with limited assists expected

CALVING EASE ★

Bull should only be used on cows - expect high birth weights

CATALOG ORDER

We have organized the catalog primarily into sire groupings and then for your convenience by calving ease to allow for easy transition between lots during the sale closing period.

Size Matters

Extensive research by the University of Oklahoma of rangeland cow herds showed that for every 100 lbs a cow is heavier she will wean only 6 more pounds of calf. A cow weight of 100 lbs will need the equivalent of 1.67 lbs of hay or its pasture equivalent per day more. Over 365 days that equates to 610 lbs of dry matter forage for the year. At \$80 per ton that is \$24.40. On a \$.20 slide the extra 6 lbs of calf is worth about \$5.78. Subtract your extra cost of \$24.40 from your revenue of \$5.78 each extra 100 lbs your cow weighs costs you \$18.62 per head per year.

We have been doing foot and udder scores on our entire cow herd since 2014. It is no small feat I assure you.

The extra effort of all these records has helped us identify issues in our bloodlines as well as issues in new bulls used.

50H has been a key part of our program at Ole Farms. He is moderate framed and very well suited to our environment. His daughters have proven themselves to be some of our best cows. He's a favorite for calving ease, being in the top 3% of the breed for that trait. Now deceased – limited semen available – get a son now while you can.

We have used 27C as a AI sire for a decade. His sons have been very popular in the past. His calves just plain work. He has a very maternal pedigree, from the breed legend dam, DDA Melissa 824. An excellent calving ease sire, with top 9% of the breed for calving ease.

Coleman Bravo is a new sire for us in 2021. He has extra weaning and yearling weight, and still has a moderate mature size. He is in the top 1% for calving ease and top 3% for docility. Bravo was the top seller at Coleman's 2018 Bull Sale at an impressive \$450,000. His progeny continue to be popular.

WINTER IN THE CORN

We get approximately 240 cow (1250 lb. cow) days on an acre of good corn or swath grazing.

Did you know that if you manage the grazing so that manure is evenly distributed the cows will deposit 64 pounds of nitrogen, 45 pounds of phosphorous and 156 pounds of potash on each acre?

At today's crazy prices that is \$243/Acre!"

OLE FARMS GRAZING MANAGEMENT

- *Rest Period* – In our area we need approximately 35 days of rest in the May, June and July period. (That will vary somewhat with conditions.) So if we start grazing May 15 we can't go back to that paddock until June 20. Our goal would be to have all paddocks grazed in 35 days.
- *Graze Period* – When grass is actively growing cattle will start re-grazing after 3 days. Therefore, we like to stay 3 days or less in a paddock.
- *Consequently*, if your rest period is 35 days and your graze period is 3 days, you need a minimum of 13 paddocks to satisfy both the resting period and the grazing goals.
- *By following these rest and graze rules* we can keep our forage in a vegetative state, preventing grass from heading out or going into a reproductive state where quality is diminished.
- *Later in the season* the rest and graze periods can be longer.

The best kind of a day

Notes

DIRECTIONS TO OLE FARMS

Search 'Ole Farms' on Google Maps

Blue Sign: 653040 RR232

Land Location: SE 22-65-23-W4

Bulls and bred females will be in pens on display beginning Friday and going through Monday.

You are encouraged to come ahead of time to view our offering.

EPD Definitions

EPDs are an estimation of an animal's breeding value based on its pedigree and performance. EPDs indicate the average performance expected from an animal's progeny in comparison to another animal or to the breed average. They allow for fair comparison of animals' genetics across herds, regardless of environment and management differences.

P = Parental Average EPDs: These are the most basic and least accurate EPDs. They are the best guideline available when calves are first reported and there is no performance data on them yet. Parental Average EPDs are indicated by a P for accuracy and are simply an average of the dam and sire's EPDs. If a calf has only one parent with EPDs, its Parental Average EPDs will be only half of its one parent's EPDs.

P+ = Interim EPDs: These EPDs utilize the Parental Average EPD information on the calf plus any performance data on file and its ratio amongst its contemporary group. Interim EPDs are indicated by a P+ for accuracy and have a higher accuracy than a Parental Average EPD as they also include some performance data.

% = National EPDs: Calculated in the National Cattle Evaluations (NCEs), these EPDs are the most accurate prediction of breeding value or genetic merit that can be determined from pedigree and performance data submitted. National EPDs are published with numerical accuracies that reflect the quantity and quality of data used in its calculation.

Growth EPDs

BW = Birth Weight: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

WW = Weaning Weight: Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

YW = Yearling Weight: Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth.

Fertility Trait EPDs

Milk = Milk: Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

SC = Scrotal Circumference: This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

CED = Calving Ease Direct: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

MCE = Maternal Calving Ease: Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the MCE EPD, the more likely it is that the animal's daughters will give birth without assistance.

GENETIC EVALUATION ANGUS BREED AVERAGES

To evaluate an animal using EPDs it should be compared to the breed average. This is not zero (0) for any trait, rather, it is an average of all the values for animals of that category in the breed, and changes every evaluation. EPD breed averages are calculated for three categories: non parents under 2 years of age, active dams, and active sires.

Average Black Angus EPDs / Red Angus EPDs for all CALVES born in 2021

EPDs: CED: +3.3 BW: +2.1 WW: +49 YW: +86 MCE: +6.7 MILK: +22 SC: +0.78

EPDs: CED: +2.5 BW: +1.2 WW: +38 YW: +64 MCE: +5.2 MILK: +23 SC: +0.61

Terms & Conditions

CATTLE INSPECTION: All carry permanent identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to sale.

BREEDING GUARANTEE: All cattle are sound and sold with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association shall apply.

MAIL BIDS: May be entrusted in complete confidence to any of the Sale Staff listed.

INSURANCE: Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representatives on sale day.

TERMS OF SALE: Cash or cheque at par, payable to Clerks of the Sale on Sale Day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

ALL PERSONS who attend the Sale do so at their own risk, and the Owners, Sale Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.
